Scope of Call for Papers

This call for paper encourages submissions from diverse perspectives, including theoretical, empirical, and policy-oriented approaches on the following issues:

Geopolitical Risks and Central Banking

- How central banks navigate financial risks in the face of geopolitical shocks, trade tensions, and shifting global alliances.
- The decline dominance of the U.S. dollar and the rise of alternative global currencies—implications for capital flows, monetary policy, and financial stability in emerging markets.
- The effects of geopolitical disruptions and trade fragmentation on inflation, exchange rates, and central bank policies.

Climate Risks and Sustainable Finance

- Integrating climate risks and green finance into monetary policy and financial stability strategies.
- How climate change and the shift to a low-carbon economy impact financial stability, asset values, and central bank operations.

Monetary and Fiscal Policy in a Changing Global Economy

- Fiscal-monetary policy coordination amid geopolitical and climate risks.
- Inflation targeting and economic stability in an uncertain global financial environment.

Digital Transformation and the Future of Money

- The use of artificial intelligence in macroeconomic forecasting and mitigating risks for central bank policymaking.
- The role of digital currencies, fintech innovations, and cyber risks in shaping the future of payments and financial systems.

Publication Opportunities

Following a regular double-blind peer-review process, invited papers will be considered for publication in the Bulletin of Monetary Economics and Banking (BMEB) regular and Special Issues, or in a Special Issue/regular issue of any of the following BMEB's partner (Scopus and SSCI Indexed) journals: (1) Emerging Markets Finance and Trades, and (2) Pacific-Basin Finance Journal.

About the Journal

BMEB is an international peer-reviewed and open-access journal. BMEB focuses on a broad range of topics covering monetary economics and policy, finance and banking, macro-prudential policy, payment systems, financial stability, financial markets, economic growth, and structural reform that are of regional and global relevance. The BMEB's scope is global and the journal endeavours to publish high quality research that contributes to the literature and/or has an impact on policy making and/or policy design. In this regard, BMEB welcomes research papers from both central bank and non-central bank economists, academics, and policy makers regardless of their institutional affiliation and geographic location.
